Boil Water Advisory Continues

A precautionary Boil Water Advisory, issued to approximately 200 City of Manitowoc business and residential customers Monday, will be continued to until further testing is completed and results of the tests are known. The results are expected early Wednesday morning.

The area affected is south of West Custer Street, and west of South Rapids Road.

The advisory was issued following a fire hydrant on Hecker road being struck by a motor vehicle early Monday morning. The resulting loss of water pressure in the zone made the advisory necessary.

Customers in all other areas of the city are not affected by this loss of pressure and water continues to be safe for consumption.
