Notes:

In order for MPU customers to be eligible for the reimbursement for a portion of the costs for the replacement of a lead service line, a pre-qualified plumber/contractor that is listed above must do the replacement.

All lead or galvanized iron plumbing between the watermain and the building meter must be removed to qualify for WDNR funding.

The plumbers are not listed in any particular order. Customers must contact the plumber directly to get a quote for the lead service line replacement. WDNR funding requires at least one (1) quote for reimbursement eligibility; customers are encouraged to obtain at least two (2) quotes.

MPU reserves the right to remove, add or modify plumber/contractors on this list at any time.
