Power Outage – June 28, 2022

Manitowoc Public Utilities (MPU) experienced a power outage that affected approximately 2,000 customers the evening of June 28, 2022. Multiple circuits were affected causing an outage in a few different areas of our service territory. Protection relays at the substation sensed a fault causing the outage, but upon physical patrol of the lines, a fault was not found. Electric Distribution employees were able to restore power to each circuit at different times, the last restoral around 10:25PM. Further investigation into the cause of the outage will occur today.
